POLITICAL PARADE

By CLEM WHITAKER

California's strategic role in the 1944 presidential election—particularly its powerful position in the Republican National Convention, which will select the GOP standard-bearer—has been newly-emphasized by a preliminary announcement of the number of delegates that will be allocated to the various states at next year's convention.

In the semi-official tabulation of state delegations, just published by The Republican, national party organ, New York state leads the list, as usual, with the greatest number of delegates; Pennsylvania is secnod, Illinois third—and California is tied with Ohio for fourth place.

Here is the voting strength of the five top states, so far as the GOP Convention is concerned:

New York, 92; Pennsylvania, 70; Illinois, 59; California, 50; Ohio, 50.

There will be 982 delegates at the 1944 Convention—and of these, the five big states will control 321.

Two possible contenders for the Republican nomination are from New York state — Wendell Willkie, the 1940 nominee, and Governor Thomas E. Dewey. The latter, however, has said he is not a candidate — and the only strategy left open to his followers, as a consequence, is to try to start a draft movement at the Convention.

Ohio's "favorite son" is Governor John W. Bricker, whose chief backer is Senator Robert Taft from the same state.

Michigan, which is sixth state in number of delegates, with 41, has a possible (but not probable) contender in Senator Arthur H. Vandenberg, who is currently playing down the likelihood of his own candidacy and trying to launch a boom for General Douglas MacArthur.

It is clearly apparent, if the roll-call is checked, that the candidate who comes out of the Convention with the the Republican nomination must muster the support of at least a majority of the delegates from "the big five" states and that once he has achieved this strength, he can win through with only scattering support from the other states, if necessary.

To Willkie, Dewey and Bricker, who can be rated as the three leading contenders, at this writing, California is of vital importance— and is now considered "open territory," since Governor Warren has made it plain that he will not be a candidate. And that may explain the sudden influx of political scouts from the east, who are now canvassing the California situation.

Officers of Ada Rebekah Lodge Installed Tuesday

Tuesday evening in the I. O. O. F. hall, Campbell, Mrs. Frances Reed and her staff, installed the officers of Ada Rebekah lodge in colorful ceremonies. Mrs. Reed is district deputy president of district number three and a member of San Jose lodge.

Officers installed were:

Bonnie Silberbauer, past noble grand; Arlene Murdock, noble grand; Eva Dahl, vice grand; Edith Morley, recording secretary; Dixie Keesaman, financial secretary; Zadie Rice, treasurer; Lillian Carney, trustee; Laverna Hodges, warden; Neva Kenny, conductor; Thelma Whitmore, chaplain.

Minnie Wehmeyer, musician; Josephine Keesaman,, right supporter to the noble grand; Anna Bachman, left supporter to the noble grand; Etta Eddlemon, right supporter to the vice grand; Ellen Arnold, left supporter to the vice grand; Lottie Rice, inside guardian; Carrie Silver, outside guardian; Grace Gardner, color bearer and reporter; Edith Soutar, right altar bearer; Dolly Landis, left altar bearer; Myra Payne, Eva Bachman, Kathryn Jones, finance committee.

Mrs. Reed and Hazel Tousseau, deputy marshall of Sunnyvale were presented gifts from the lodge. Bonnie Silberbauer received her jewel from the lodge and a gift from her officers.

The lodge rooms were artistically decorated in the patriotic motif and colors of red, white and blue for the occasion. Refreshments were served following the installation.

Pvt. Donald Rice Is In Maryland

Pvt. Donald Rice, son of Mr. and Mrs. S. G. Rice of North Central avenue, and graduate of Campbell Union High school, class of '41, has been sent by the army to Western Maryland college at Westminster, Md., for an 18 months course in engineering.

Pvt. Rice, who had been stationed in Texas for six months, was one of a small group of 200 candidates who successfully passed the required examinations .

He writes that he is very glad to be where there are green hills and trees and as he is only about 50 miles from Washington, D. C., and has a week off every three months, he hopes to see something of the capital and surrounding country.

Walter Reynold Keesling has been commissioned a second lieutenant in the Army Air corps at exercises held at Randolph Field, Texas. He received his final training at Ellington Field. Lieut. Keesling is a son of Mr. and Mrs. Mervyn Keesling, and a graduate of Campbell Union High school, class of 1935.

OUR DEMOCRACY——by Mat

WE FLY THROUGH THE AIR—
FOR 200 YEARS MEN EXPERIMENTED WITH BALLOONS, WHICH WENT ONLY WHERE THE WIND BLEW THEM. NOT UNTIL 1903, WHEN ORVILLE AND WILBUR WRIGHT PERFECTED THEIR AIRPLANE DID MEN FLY WHERE THEY WANTED TO GO— AND MODERN AVIATION WAS BORN.
NOW, ONLY 40 YEARS LATER, IT ENCOMPASSES THE WORLD... AMERICAN FIGHTING MEN-INVENTORS-MECHANICS—ARE TUNED TO THE AIR....NEW GOALS OF ACHIEVEMENT ARE SET AND PASSED WITH EVER ACCELERATING SPEED.. AMERICAN TRANSPORT PLANES CARRY MILLIONS OF POUNDS OF CARGO OVER HUNDREDS OF THOUSANDS OF MILES OF LAND AND SEA... AMERICAN BOMBERS AND FIGHTERS STRIKE WITH TERRIFIC FORCE ON EVERY FRONT.
AMERICAN INGENUITY IS KEYED TO THE JOB— ITS IMMEDIATE OBJECT A MIGHTY DRIVE —
IN AN AIR-LINE TO VICTORY.
HUBERT MATHIEU

- Items In Brief -

Mr. and Mrs. Budd Levenberg attended the Ice Follies in San Francisco Wednesday evening, reporting an excellent show.

Harold L. Mears, 25, of Fort Ord, and Betty J. Tatum, 21, of Campbell, were granted a marriage license Tuesday.

Mr. and Mrs. George Card of Los Angeles came up Sunday and returned Monday, taking home with them his sister Mrs. Jessie Lillingston. Mrs. Lillingston, mother-in-law of Mrs. Bernice Lillingston has been in Campbell for two months arriving in May to be present at the graduation from the Campbell Union High school of her granddaughter Miss Pat Lillingston.

Lieut. N. K. Atkinson of New York last week returned to his station after a week's visit with his parents, Mr. and Mrs. Zo Atkinson of Apricot avenue. Tech. Sgt. Dean Atkinson who has been stationd in Tennessee is also now in New York.

Rosemary Smith, airplane mechanic at McClellan Field, near Sacramento, is visiting her family, the Walter B. Smiths of Sunnyside avenue.

Cpl. James Fablinger, U. S. M. C., stationed on Goat Island, visited here briefly Saturday.

Two tickets to the Campbell Theatre are awaiting Mr. and Mrs. Walter Dahms. Call at Press office.

Sharon and Jimmie Murdock, daughter and son of Mr. and Mrs. J. E. Murdock, and Barbara Sellers, daughter of Mr. and Mrs. Neil Sellers of Milton avenue, had tonsil operations Monday and all are progressing satisfactorily.

Miss Daisy Pannell has returned to her post at Field's store having recovered from her recently illness.

The board of directors of the Campbell Sanitary district announced at their meeting Wednesday evening that a five per cent reduction in the sewer district tax has been made for the 1943-44 taxable year.

Mr. and Mrs. Anthony Raffanti and Robert; Mr. and Mrs. Joseph Furtado and Mr. and Mrs. Peter Spragia, spent the holiday week-end in Santa Cruz.

Elmer Shidelor Aviation Cadet

Entering the last lap of his aviation cadet course is Elmer M. Shidelor, 22, of Campbell, who has completed basic flying training at the Coffeyville, Kansas Army Air field and has been sent on to advanced training.

Upon completing the twin-engine course at Altus, Okla., he will be awarded the silver wings of an army airman and will be commissioned a second lieutenant.

Mrs. Tom Shaves has been seriously ill the past week but is reported as improving steadily.

Kiwanians Have Barbecue Tuesday

Barbecue Tuesday.

In lieu of their regular meeting last Tuesday the Kiwas club members journeyed to the country estate of one of their members, Ray Bishop, in the Glen Una district of Saratoga.

J. Budd Levenberg was the member chef in charge of the barbecued chicken dinner served to the members and guests, followed by a casual inspection of the grounds. Some of the members played bridge the rest of the evening.

A large group was given an opportunity immediately after dinner of going to the Dutch Recuperating Home nearby which is maintained for Dutch soldiers on short shore leave. The charming host and hostess of the Home graciously conducted the group on a tour of the building and grounds.

Next Tuesday evening the interclub committee announced a joint meeting with the Mountain View Kiwanis club at Campbell at which Frank J. Callahan will speak and the chairman of the evening will be G. E. Farley. The subject of the talk will be "Something Different."

Chuck Dondero Seriously Injured

Chuck Dondero, popular Campbell high school student, was seriously injured last week end while diving into a plunge near Los Angeles.

His parents, Mr. and Mrs. Charles B. Dondero of Milton avenue, were notified of the accident and left immediately for the south. His sister, Connie Dondero, and Charlotte Robertson, who were returning from a Girls' Reserve convention in the south, were summoned and detrained at Los Angeles to meet the Donderos.

According to reports Chuck has a broken vertebra in his neck and will be brought home as soon as he can be moved.

Chuck quit school here several months ago to attend a naval radio school in Long Beach and was progressing very rapidly in his course.

High School to Sell Property

The Campbell Union High school board of trustees has advertised for sale, the property at the corner of Fourth street and Rincon avenue belonging to the Campbell Union High school district.

Sealed bids for the purchase of this tract will be opened Monday evening, July 12 at 7:30 o'clock in the high school building.

A complete description of the property appears in the legal notice "Resolutions of Intention to Sell Real Estate" on page 4 of this paper.

Two tickets to the Campbell Theatre are awaiting Rev. and Mrs. J. H. Bennett. Call at Press office.

Observation Post Here Operates Efficiently

During the past several months the observation post here has operated very efficiently, having a 100 per cent record for seven consecutive months, with high school students and adults serving under the leadership of C. P. Klassen, Chief observer and staff.

Now with the closing of school and the opening of the cannery many students and adults are unable to serve because of working hours, and to obtain observers to fill in the vacancies, has become very difficult according to reports from the directors.

Leaders are constantly seeking persons to serve at the post and any one who can possibly take a shift or even substitute is asked to call C. P. Klassen or Mrs. Ralph Hyde. Observers serve in four-hour shifts—6 to 10; 10 to 2; 2 to 6; for 24 hours.

High school students serving 50 hours or more up to close of school are Carl Field, Jr., Dan Clark, Jr., Ray Mathis, Jr., Douglas Strong, Don Smith, Anthony Vicari, Roy Van Gorkom, Helen Rue, Ruth Cousins, Chuck Dondero,, Lawrence Cowper, Bob Reese, Sheila Hill, Roy Zimmer, Bob Magnuson and Connie Dondero.

Members of the high school and grammar school faculty and the many townspeople and students who have served deserve a great deal of credit for their never ceasing vigilance, taking care of one of the most important jobs on the home front.

Relatives Visit Schwab Family

Mrs. Frances Hill and daughters, Margaret and Franceen, of Los Angeles were week end guests of Mrs. Hill's parents, Mr. and Mrs. H. G. Schwab and sister, Mrs. James Ryan.

The Hills were former Campbell residents, and friends will be interested to hear that Franceen graduated on June 25 from the Hollywood Professional High school on Hollywood boulevard as valedictorian and honor student of the class. Mrs. Hill is one of the members of the faculty of this institution.

Miss Margret Hill is on her vacation from the Basic Magnesium, Inc., of Las Vegas, Nev., where she is now secretary to the assistant manager.

W. H. Van Dyke, president of the Campbell Kiwanis club, J. E. Murdock, junior past president, and C. P. Klassen, division 12 chairman of music, have been invited to attend a week-end conference of lieutenant governors to be held at Santa Cruz. Earl Harris of that city, lieutenant-governor of division 12, is host and Thomas E. Gore of Riverside, governor of the California - Nevada district will be present.

FEUDING IN WASHINGTON

We do not pretend to know who is right, and who is wrong in the angry disagreement which has flared up in Washington between Vice President Wallace and Secretary of Commerce Jesse Jones, nor de we believe the people have any great interest in their personal differences. In the broad sense, they are both wrong—and are both guilty of rendering a distinct disservice to their country.

This is no time for bitter feuding and name-calling in our high command in Washington and it is to be hoped that the President will knock their heads together and put an end to it.

The American people have brushed aside their petty differences, for the most part, and are working in harmony to win a war. And they expect their public officials to do likewise.

NEWSPAPERS BOOST BOND SALES

The newspapers certainly "went to town" in their support of the Second War Loan and the tremendous quota of $13,000,000,000 was oversubscribed by more than $5,000,000,000.

Complete news coverage; locally developed features; editorials, cartoons, banner heads, front page boxes—everything in the imaginative initiative of newspaper editors came to the support of the most stupendous financial undertaking in history

Advertising departments delivered a fantastic accomplishment. In less than a month, 9,493 newspapers published 73,938 separate advertisement to the tune of 72,633,802 agate lines. Never before did so much newspaper advertising support the sale of any product or service—and never was so much of anything sold.

The entire performance fills every newspaperman with pride. It was further evidence of the power of newspapers, large and small, dailies and weeklies, in selling a worthy product to everyone, everywhere. More than that, it was another demonstration of the indispensable public service of the newspapers.

The Second War Loan is history. The every day sale of War Bonds continues. When the Terasury Department gets ready to launch another campaign the newspapers will again be called upon for superlative efforts and will again "go to town."

COMING FOR THE RIDE

Argentina, important factor in total friendliness of the Americas, has now suggested sending a special mission to the United States for the discussion of political, economic, and military questions. Possibly our lend-lease to Brazil has worried Argentina, in view of her own needs for raw materials.

When the Castillo government was overthrown, the Americas rejoiced. It was believed that junking the "prudent neutrality" policy and breaking with the Axis would follow. But, not so. The new regime has done little to disturb Axis agents who flourish there. On the other hand, they have closed the headquarters of a pro-Allied women's organization supplying medicine and bandages for United Nations' troops.

It may be that in suggesting the mission Argentina wants to find out how much assistance we would give if she broke with the Axis. However, one thing is certain, if Argentina still "wants to be alone" among the Americas in her foreign policy, the mission, if it comes, will be coming for the ride—and that's all.

PAY-AS-YOU-GO

For the first time in our history, we are paying our income taxes on a current, or pay-as-you-go basis. By this time you have filled out and filed with your employer an Employee's Withholding Exemption Certificate so that you will pay the 20 per cent only on your wages or salary above the amount of your exemption. This exemption is $12 per week if single, $24 if married, and $6 for each dependent.

Secretary of the Treasury Morgenthau estimates that the average American will pay approximately 4½ to 5 per cent of his gross income under this tax. And that's a very small assessment toward the price of freedom!

Under the old system many of us had the habit of setting aside funds in a taxtime savings account and remitting to Uncle Sam every three months. At present even though we pay taxes currently, the saving habit is more needed than ever. It can help prevent inflation. We are given every opportunity to put every spare nickel into war bonds as a reserve against post-war adjustments, possible further tax increases and unforseen emergencies.

Pay-as-you-go taxes plus war bonds will more effectively aid the fight, not only against the "Jerrys" and the Japs, but against our own Public Enemy Number One—inflation!

★ ★ ★ ★

AMERICA'S STOMACH ACHE

The resignation of Chester Davis as Food Czar is just another pain in the nation's stomach. Mr. Davis, who is highly regarded in official circles as an executive, bluntly told the President that the subsidy program won't work in its present form. He also pointed out that while he was Food Czar in name, and was charged with the responsibility for the food program, he had little authority over the broad policy or the day-to-day actions that concerned that program.

Mr. Davis' complaint about lack of authority is not new. In fact, it is one of the most insistent cries that can be heard above the babble of the alphabetical menagerie on the Potomac. He was drafted by the President to straighten out the food situation. He was willing to try. But apparently he was not given the tools to do the job. Titles are worthless unless authority goes with them. Mr. Davis evidently knows this.

★ ★ ★

NUMBER ONE STATE

California's role in this war is infinitely more important than in World War I. This is due not only to her strategic position, which makes her America's other "front door" in the global struggle, but because of—well, let's look at the figures—they tell the story.

Take all-important food production, for instance. Last year we turned out crops valued at $1,167,000,000—approximately 10 per cent of the nation's entire food supply. That's twice the value of the crops our state produced in 1919—a year still heavily under the influence of the "other war" boom.

Last year California employed 671,000 industrial workers—more than three times as many as in 1919. They collected $1,474,000,000 in wages, and that was a five-fold increase. Products manufactured last year were valued at $8½ billion, as compared to $1,858,000,000 in 1919

From June 1940 through February 1943 our plants undertook more than 20 per cent of all aircraft contracts, about 15 per cent of all contracts for ships, as well as leading in war supply and facility contracts with a "grand" total of $11,856,000,000 for that 33-month period.

California has become "first in war." Why not "first in peace?"

★ ★ ★ ★

HARVEST SEASON

Harvest season is here and 300,000 men, women and youths are needed to fight the battle of food production!

Last year more than $14 million worth of crops were lost because of the labor shortage. Just a part of this loss consisted of 200,000 tons of tomatoes, 20,000 tons of peaches, 25 per cent of the peas, and 30 per cent of the vegetables.

California furnishes about 10 per cent of the entire food supply of the nation. Crop reports from many other sections of the country are unfavorable. The rest of the nation and our armed forces, as well as the lend-lease program, will have to lean more heavily on our food output this year. Once harvested, these crops can be sped along to meet urgent war needs or distributed for home canning or consumption. Every bushel of grain, every tomato, every peach—everything—must be harvested. And this will require work on vacations, on week ends, for everybody physically fit.

The harvest army is open. Be a soldier! Enlist today!

Used Grenades in 1776

Hand-grenades have never gone entirely out of fashion. They were used by the marines who served under John Paul Jones during the Revolution, and they have proved to be highly effective in fighting the Japs at close quarters in the Solomons

HERE'S HAPPY RELIEF

If you suffer from backaches resulting from fatigue or exposure... if sore muscles or a stiff neck have got you laid up... SORETONE is what you need. It is a medicinal, analgesic solution developed in the famous laboratories of McKesson & Robbins in Bridgeport, Conn.

SORETONE acts fast—gives soothing relief right where relief is needed—speeds the superficial blood flow to the affected area. Also helps to prevent infection. Not an animal preparation—made for human beings. Wonderful, also, for sore, tired feet, and for relieving itch of Athlete's Foot. MONEY BACK IF NOT SATISFIED.

SORETONE
FOR ATHLETE'S FOOT · MUSCULAR PAINS

Kidneys Must Work Well-

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of *why* the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*? You will be using a medicine recommended the country over. *Doan's* stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get *Doan's* today. Use with confidence. At all drug stores.

THE BOOK MARK

by marty

"Mother Russia" by Maurice Hindus.

"In this book, as in others I have written, my chief concern has been the people. After a quarter of a century of Sovietism and fighting the most crucial war of their lives and of their history, they are much changed. They are not like the people they were in 1917, in 1923, in 1928, hardly even like the people they were in 1939, the year of the adoption of the new Constitution."

To further expand the author's purpose for writing this book, and a great heroic purpose it was, let me quote another paragraph from the preface of this "Mother Russia."

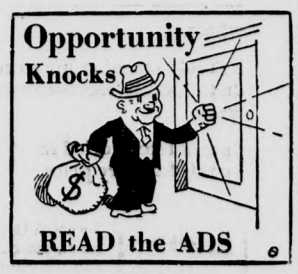
"I went to Russia with only one purpose in view—to hear the people talk. I use the word people not in the English but in the Russian sense—meaning the dark masses; that is, the muzhik, the peasant." That quotation is an exerpt from a previous publication by the author, which he uses in explanation of this book.

Mr. Hundus writes at great length, employing specific instances and dramatic experiences, to strengthen his idea about the best method of learning about a nation by mingling with the masses. "I have always felt that a single day in a village or a single meal with young people in a factory would tell me more of the heart and the mind of Russia than an interview with any leader, however exalted."

This method enabled the author to predict immediately after their 1939 pact that Russia and Germany would ultimately be at war. When Germany did attack and people began to prophesy the end of the Soviet Union, he began work on his unequivocal "Hitler Cannot Conquer Russia." Since then Mr. Hindus has gone back to Russia, and after a year and a half of fierce fighting he found the people stronger and more determined than ever.

Over a period of twenty years the author has written, studied, talked and learned about the Russian people, their language, their customs, their hatreds and their loves. Much of those years he lived in Russia; so it is not with haphazard decisions that "Mother Russia" makes its appearance. It is a book that contributes greatly to our knowledge of one of our most important allies.

Two tickets to the Campbell Theatre are awaiting Mr. and Mrs. Martin Walsh. .Call at Press office.



SHOCK TROOPS in the Victory Garden .. WORMS

Worms are the original shockers as far as the beginner in gardening goes. Worms exist apparently with only one purpose in life and that is to eat as fast as possible and grow as rapidly as possible in order to pass on into the adult stage. Not many types of worms live and die in that stage but soon pass through a transition stage and become butterflies, moths, beetles or other very different forms of insect life.

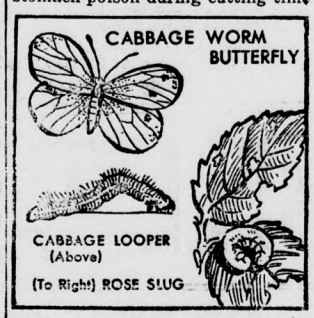
Some of our prettiest millers or moths grow from worms. The cabbage butterfly is a beautiful sight when a bevy of them are fluttering around the garden, their white wings decorated with several black spots, but between flutters every female butterfly is laying eggs which will soon hatch into heavy eating green worms that riddle the cabbage heads. The potato bug at one stage is a reddish brown worm, while the bean beetle passes a considerable portion of its life as a lowly worm. A number of insects such as leaf hoppers, squash borer and the like pass through what is called the nymph stage, which is a worm for all practical purposes, at least as far as efforts to combat it are concerned.

Corn borers are worms that drill into the stalks and ears of corn but not to be confused with the corn ear worm that eats the kernels although both are highly destructive.

Fortunately the worm problem can be handled with poison sprays especially if spraying is started in time to catch the young worms as they hatch out. Most worms can be killed with lead arsenate and the young plants should be kept well protected by a covering laid on with regular spraying. **Keep the plants covered.** If it is a rainy season more spraying will be necessary than in a dry year. The important thing is to kill each worm before it has time to grow to any size. This cuts off loss of growing plants by getting rid of pests early before the worm has grown large enough to cause extensive damage. The young and tender worm is also a lot easier killed than a full grown one. In fact in some kinds the only way to kill them is to catch them young.

While spraying for aphis with Black Leaf 40 great devastation is caused among the young worms on the plants, in fact the use of this contact spray will often give control of the worm situation if the spraying is done early and often and at the same time the sucking insects are also destroyed.

In the case of vegetables such as snap beans, cabbage and the like care must be taken to eliminate spraying, some time before the product is to be used, with any insecticide containing a poison which will not evaporate or disappear from the edible portions of the plants. The job of protecting the crop in the later weeks must be left to a contact spray like Black Leaf 40. Asparagus tips that grow rapidly must not be sprayed with stomach poison during cutting time



for fear of human poisoning. The asparagus beetle can be controlled on the grown plants by a spray made of 1 pound of soap, 1 pound of lead arsenate and 15 gallons of water but on the young tips use Black Leaf 40 that kills the bugs and is soon gone leaving no chance for human poisoning.

For young worms Black Leaf 40 should be used stronger than for aphis. The worm spray should be as strong as 1 teaspoonful to a quart of soapy water. It will need to be applied a couple of times a week if worms appear in order to kill them as they hatch. Where this treatment is followed no trouble need be feared from aphis.

YOUR JOB AT HOME

THE best insurance for starting the day right is a nourishing, appetizing and satisfying breakfast. Too often in these days of increased activity breakfast is passed over hurriedly . . . and lightly, and is apt to be most inadequate.

Did you ever stop to think that from the evening meal of one day to the morning meal of the next more time elapses than between any of our other meals? The very name breakfast implies this . . . you know it really means break the fast. So don't let anyone in your house dash off in the morning without a good sustaining meal to start the day.

Be sure that you send your husband off to his work with a heartwarming breakfast that will stick to his ribs. And for the final superb touch serve fragrant delicious coffee. It will pep him up and make his breakfast and his whole day seem more worthwhile. And he is certainly entitled to this bit of pleasure even if the war has taken away many others. The truth is that here is one bright spot at least in all this food rationing business. The coffee situation is improving. There's enough coffee in the country today to amply take care of our ration coupons.

Men do love good coffee. They are cranks on the subject. They want it . . . and they want it good. So give your man the pleasure of a piping hot delicious cup of coffee at breakfast every morning. It gives the lift that all workers want and need to start a busy day. Be sure your family gets the most benefit from this great morale builder.

Get your fair share of the coffee available. The armed forces get theirs first, you know, so you are not depriving them when you enjoy your own morning coffee.

This Month's STAR RECIPE

By BETTY BARCLAY

My star recipe for this month is a pudding recipe — one that may be made even by the cook whose ration coupons are practically all used. And this pudding made almost entirely from unrationed foods will please both the adults and the children. It is economical; it is healthful and it is easy to prepare. That brings it pretty close to one hundred per cent perfect.

Cereal Pudding

3 tablespoons flour
⅛ teaspoon salt
2 cups milk
¼ cup honey
2 eggs, beaten until thick and fluffy
1 tablespoon butter
1 teaspoon vanilla
½ cup Grape-Nuts

Combine flour and salt in top of double boiler; add milk gradually, stirring until smooth. Add honey and blend. Cook and stir over boiling water 8 minutes. Pour small amount of mixture over eggs, stirring vigorously; return to double boiler and cook 2 minutes longer. Remove from fire; add butter and vanilla. Cool. Add cereal. Chill. Serves 6 to 8.

Soy Bean Planting

Successive crops of soybeans increase the hazard of soil erosion and also take excessive amounts of the phosphate and potash from the soil. Either oats, barley or corn is a better crop to follow soybeans than to repeat the soybeans. Soybeans can be planted advantageously on corn stalk or corn stubble land especially since the proposed reduction in oat acreage will cause farmers to use some other crop to replace oats. Small grain stubble fields which were not seeded or where the meadow seeding failed also are likely spots for soybeans.

Hiring Provisions For Minors In Food Plants

Federal provisions controlling the employment of minor boys and girls in canneries and other food processing and packing plants were explained by Mary B. Perry, Consultant for the Western Region of the Department of Labor's Children's Bureau.

Miss Perry said that the Federal regulations controlling minimum standards affect all establishments engaged in canning, quick freezing, dehydrating ,drying and packing fruits, vegetables and seafoods if the foods produced are shipped across state lines or are produced for government contract in excess of $10,000. The following standards control:

1. The minimum age for persons engaged in canning, dehydrating and freezing operations is 16 years. In dry yards where prunes, raisins, dates, apricots, peaches, pears and similar fruits are given sun and warm air treatment, boys and girls of 14 and 15 may cut and sort fruit under special conditions. They may not work in proximity to sulphur kilns. For other work in dry yards the employee must be at least 16 years old.

2. Workers of 14 may be used in packing sheds where fresh fruits are wrapped and crated in their natural state for shipping. This includes wrapping tomatoes, crating apples, citrus fruits, cantaloupes, or other perishable fruits and vegetables.

3. Children of 14 and 15 may work in canning, dehydrating and freezing plants only if they do office work or are engaged in other employment that does not involve manufacturing or processing. They may have no duties in work rooms where foods are processed. The only occupation prohibited in connection with food processing which is closed altogether to persons under 18 is that of motor vehicle driver or helper.

4. All minors under 16 may work not more than eight hours per day in the packing sheds. Normally, they may not work after 7 p. m., nor before 7 a. m., however, the youthful worker may stay on the job as late as 10 p. m. providing he does not exceed eight hours in any one day.

5. Employers should obtain a work certificate from all workers under 18 years of age which should be kept on file by the employer. These certificates usually are issued by local school officials.

6. In cases where there is a conflict between state and federal regulations, the higher standard should be observed.

Supervisors Reject Request

The county board of supervisors rejected by a vote of 3 to 2 a request from the Santa Clara County Farm bureau for a $10,000 item to be included in the 1943-44 budget.

The extension service, which the appropriation would have established, and which functions in many California counties would give ranchers the services of a farm advisor.

Vote on the motion to grant the appropriation was Arthur Brown and C. P. Cooley, yes; E. O. Wool and Walter Pfeiffle, No; breaking the tie vote, chairman Joe McKinnon, no.

LEGAL NOTICES

RESOLUTION OF INTENTION TO SELL REAL ESTATE

It is hereby resolved, ordered and declared by the Board of Trustees of the Campbell Union High School District of the County of Santa Clara, State of California, as follows:

That the property hereinafter described is not now or never will be needed for public use by said Campbell Union High School District. That it is the intention of the said Board of Trustees to sell all the following described real property belonging to said Campbell Union High School District, which said property is situated in the County of Santa Clara, State of California, and is particularly described as follows:

Beginning at a three-quarter inch pipe set at the point of intersection of the Northerly line of Rincon Avenue with the Westerly line of Fourth Street; thence running Westerly along the Northerly line of Rincon Avenue North 89 degrees 51 minutes E. 183 feet to a three-quarter inch pipe; thence Northerly and parallel to the Westerly line of Fourth Street North 0 degrees 30 minutes W. 250 feet to a three-quarter inch pipe; thence Easterly and parallel to the Northerly line of Rincon Avenue South 89 degrees 51 minutes E. 183 feet to a three-quarter inch pipe set in the Westerly line of Fourth Street; thence Southerly along the Westerly line of Fourth Street; thence Southerly along the Westerly line of Fourth Street South 0 degrees 30 minutes E. 250 feet to the point of beginning.

That the 12th day of July, 1943, at 7:30 o'clock P. M. of said day in the office of the principal of the Campbell Union High School District situated near the corner of Campbell Avenue and the Santa Clara and Los Gatos Road, Santa Clara County, California, (that being the regular meeting place of said Board of Trustees) be and the same is hereby fixed as the time and place for public meeting of said Board of Trustees at which sealed proposals to purchase said parcel of land will be received and considered, and such sealed proposals are hereby invited and will be considered at said time and place, the Board reserving the right to reject any and all such proposals. Said sales will be made for cash, lawful money of the United States, ten per cent (10%) to accompany the bid and balance payable upon delivery of deed.

The proposal or bid shall be enclosed in a sealed envelope addressed to the Board and shall be accompanied by a certified check of some responsible bank, payable to the Board of Trustees of Campbell Union High School District in the amount above required.

It is further resolved and ordered that this Resolution shall be published once a week for three successive weeks in the Campbell Press, a newspaper of general circulation, published in said County of Santa Clara, and that copies of this Resolution ludy signed by a majority of this Board be posted in three public places in said district not less than fifteen days before said date of meeting to be held July 12, 1943 as aforesaid.

Passed by the Board of Trustees of the said Campbell Union High School District at a regular meeting held May 1943, by the following votes:

Ayes: Trustees Mr. R. B. Bishop, Mrs. Jessie A. Shelley, Mr. W. N. Lloyd, Mr. J. V. Gomes and Mr. John D. Blaine.

Noes: Trustees none.

Absent: Trustees none.

Signed: Jessie A. Shelley, Clk.

Tastes Like Meat

To help fill the gap by meat rationing, Mrs. Julia Kiene, director of Westinghouse Home Economics Institute, suggests this kidney bean loaf which looks like meat and actually tastes like it:

2 cups dry kidney beans
2 cups water
4 cups stale bread crumbs
1 cup grated cheese
1½ teaspoons salt
½ cup chopped celery
½ cup chopped onion
½ cup shortening
1 egg
½ teaspoon pepper

Soak beans overnight in the 2 cups of water. In the morning, bring to a boil in the same liquid and then simmer until beans are tender. Mash beans fine and add all the other ingredients, mixing well. Pack into loaf pan and back on 5th set of glides for 1½ hours in 325 degree oven. Baste occasionally with 1 tablespoon melted butter and ¼ cup water. Serves 6-8.

Winter Spraying

Winter spraying makes later spraying more effective because it kills the spores of fungous troubles before they germinate and become widespread.

Overcomes Fear

He has not learned the lesson of life who does not every day surmount a fear.

Two tickets to the Campbell Theatre are awaiting Mr. and Mrs. D. H. Cramer. Call at Press office.

For your card file. Cut along dotted lines.

Betty Barclay's Jelly Shelf

RIPE STRAWBERRY JAM

4 cups prepared fruit
6½ cups sugar
1 box powdered fruit pectin

To prepare fruit, grind or crush thoroughly about 2 quarts fully ripe berries.

Measure sugar into dry dish and set aside until needed. Measure prepared fruit into a 5- to 6-quart kettle, filling up last cup or fraction of cup with water if necessary.

Place over hottest fire. Add powdered fruit pectin, mix well, and continue stirring until mixture comes to a hard boil. At once pour in sugar, stirring constantly. (To reduce foaming, ¼ teaspoon butter may be added). Continue stirring, bring to a *full rolling boil*, and boil hard 1 minute.

Remove from fire, skim, pour quickly. Paraffin hot jam at once. Makes about 10 glasses (6 fluid ounces each).

LOST

Lost, a cough due to a cold—thanks to the soothing action of Smith Brothers Cough Drops. Smith Bros. Cough Drops contain a special blend of medicinal ingredients, blended with prescription care. And they still cost only 5¢ a box. *Yes, a nickel checks that tickle.*

I'm Dehydrating fruits and vegetables

But FIRST...I learned what I should not do and what I should do

● Drying of fruits and vegetables can be done in the home by means of a dehydrator cabinet equipped with a proper type electric heater or on trays in your kitchen range. It takes careful preparation of foods to be dried, plus time, patience and constant attention or the food will be spoiled and wasted. Below is a list of some of the should and should not precautions to take in drying food at home.

I SHOULD select vegetables and fruits carefully, using only fresh, firm produce.

I should work quickly to keep produce in full flavor.

I should steam-blanche all foods until they are tender.

I should place the blanched foods on drying trays in half-inch layer.

I should dry at correct temperature at full time for each specific food.

I should stir or turn foods being dried and rotate position of trays.

I should store dried food in clean dry containers which are absolutely moisture, air and insect-proof.

I should be sure vegetables are brittle-dry like shredded wheat.

I should examine my stored dried food at least once every week.

I should store dried foods in a cool, dark, dry place.

I SHOULD NOT try to dry wilted, bruised, overripe or decayed produce.

I should not keep the cut-up fruits and vegetables too long in a warm kitchen.

I should not fail to use full time in steam blanching to seal in flavor and vitamins.

I should not crowd foods on drying trays.

I should not guess at time and temperature for drying, but follow chart.

I should not dry food like roasting. Food must be dried evenly on all sides.

I should not take any chance with improper dried food storage or the food will become sour or wormy.

I should not stop drying until 95% moisture is dried out.

I shonld not expect dried food to keep indefinitely.

I should not allow the dried foods to get warm or be exposed to the light.

ELECTRICITY IS WAR POWER DO NOT WASTE IT!

Successful home drying depends upon efficient equipment, the quality and kind of vegetables and fruits and the careful adherence to rules in every step in the process, including storage. Do not rush into dehydration unless you intend to work hard at it. As a first step come into any P. G. & E. office for the free booklet on *"Home Drying of Fruits and Vegetables."*
